

Pages from Hopi History

By Harry C. James

University of Arizona Press. Paperback. Book Condition: New. Paperback. 258 pages. Dimensions: 9.0in. x 6.0in. x 0.8in. Over the past thirty years, late Quaternary environments in the arid interior of western North America have been revealed by a unique source of fossils: well-preserved fragments of plants and animals accumulated locally by packrats and quite often encased, amberlike, in large masses of crystallized urine. These packrat middens are ubiquitous in caves and rock crevices throughout the arid West, where they can lie preserved for tens of thousands of years. More than a thousand of these deposits have been dated and analyzed, and middens have supplanted pollen records as a touchstone for studying vegetation dynamics and climatic change in radiocarbon time (the last 40,000 years). Now, similar deposits made by other mammals like hyraxes are being reported from other parts of the world. This book brings together the most recent findings and views of many of the researchers now investigating fossil middens in the United States, Mexico, Africa, the Middle East, and Australia. The contributions serve to open a forum for methodological concerns, update the fossil record of various geographic regions, introduce new applications, and display the vast potential for fossil midden...

Reviews

An incredibly wonderful ebook with perfect and lucid explanations. I really could comprehend every little thing using this written publication. It is extremely difficult to leave it before concluding, once you begin to read the book.
